Non-oil Foreign Merchandise Trade

Through the Ports of Abu Dhabi Emirate

January 2016

Date of Release: February 2016

Statistics Centre - Abu Dhabi

Introduction

This publication presents statistics on the value of non-oil foreign merchandise trade, which entered or exited the territory of the Emirate of Abu Dhabi through the ports of Abu Dhabi (comprising air, sea and road ports) in January 2016. It should be noted that foreign trade data presented in this publication do not cover non-oil exports and imports through ports of the other Emirates in the UAE.

The data have been sourced from the Abu Dhabi Department of Finance – Customs Administration, and the scope of the statistics therefore is restricted to the trade flows recorded at ports under the jurisdiction of the Customs Administration. The publication highlights the relative importance of each individual component of imports, non-oil exports and re-exports.

The data are presented according to the Broad Economic Categories (BEC), the Harmonised System (HS) chapters and by country for total imports, non-oil exports and re-exports.

The Explanatory Notes section at the end of this publication defines the key terms and technical concepts used in the compilation of non-oil foreign merchandise trade statistics. Readers are encouraged to refer to that section while reading the statistics and information outlined in the publication.

Key Points

Monthly non-oil foreign merchandise trade, January 2015-2016.

The total value of non-oil foreign merchandise trade in January 2016 was AED 16.1 billion, with imports of AED 9.8 billion (60.7% of total), non-oil exports of AED 4.6 billion (28.9% of total) and re-exports at AED 1.7 billion (10.4% of total).

A comparison (January 2015 to January 2016) shows an increase of AED 1.2 billion (8.1%) in total trade, with non-oil exports increasing by AED 1.3 billion (42.0%), while The value of imports value fell by AED 144.8 million (-1.5%), and re-exports by AED 26.9 million (-1.6%) over the period.

Statistical Tables

Table 1: Non-oil foreign merchandise trade through the ports of the Emirate of Abu Dhabi, January 2015-2016.

Value in million AED

Foreign trade type	January		Change (%)
	2015	2016	
Imports	9,901.1	9,756.3	-1.5
Non-oil exports	3,275.2	4,649.9	42.0
Re-exports	1,706.3	1,679.3	-1.6
Total	14,882.6	16,085.5	8.1

Explanatory Notes

Glossary

This publication contains certain terms specific to foreign merchandise trade and necessary when analyzing the trade statistics of Abu Dhabi Emirate. They include the following terms:

Merchandise Trade

Foreign Merchandise Trade statistics record goods, which add to or subtract from the stock of material resources of Abu Dhabi by entering or leaving its territory. Throughout this publication, the term merchandise trade statistics refers to trade which moves through the ports of Abu Dhabi only, and do not capture inter-emirate trade activity.

Imports

Imports are goods that enter Abu Dhabi's customs and economic district from various parts of the world, excluding other emirates in the United Arab Emirates, and receive customs clearance. Goods are considered imports regardless of whether they enter the Emirate directly or are retrieved from customs warehouses, temporary entry areas or free zones inside the country. These goods receive customs clearance in order to become part of Abu Dhabi's merchandise balance.

Re-exports

Re-exports represent goods that are imported from abroad, enter Abu Dhabi's customs and economic district and become part of the Emirate's merchandise balance. These goods are then re-exported as they are, without any modification, outside the country.

Non-oil Exports

Non-oil exports include goods that are entirely produced locally or in whose production process local resources are used. Non-oil exports through the ports of Abu Dhabi may include goods that were produced in other Emirates in the United Arab Emirates. Oil is excluded from these goods. These

goods leave Abu Dhabi's customs and economic district to the outside world, reducing the Emirate's non-oil merchandise trade deficit.

Classifications

The non-oil foreign merchandise trade statistics are presented in accordance with the two main internationally recommended output classifications: Harmonized System (HS) and Broad Economic Categories (BEC).

If users require statistics by the detailed Harmonized Commodity Description and Coding System (HS), these are available from SCAD on request. The HS is primarily an input classification, and is the basis on which traders record goods with Customs.

Data source

Data are obtained from Department of Finance – Customs Administration. The data are processed and passed to Statistic Centre – Abu Dhabi for further editing, compilation and reclassified according to statistical classifications for foreign trade.

Valuation

In line with the World Customs Organization (WCO) agreement on valuation:

- Exports (including re-exports) are valued free on board (fob), which represents the value at the export border, and includes inland freight costs and packaging
- Imports are valued on the cost insurance and freight (c.i.f.) basis, which represents the value at the import border, and includes the additional cost of freight and insurance in transporting the goods internationally

Notes on Tables

- Changes (levels and %) in all tables are based on unrounded numbers.
- Relative importance is calculated as the ratio between the value of the sub-group and the total value for all groups, expressed as a percentage.
- Totals in some tables may not add up due to rounding.
- The data for 2015 and 2016 are preliminary, and may be revised.

Symbols used

‘-‘ nil or rounded to zero

‘..’ Not significant

n.e.s. denotes ‘not elsewhere specified’
