Non-oil Merchandise Trade

Through the Ports of Abu Dhabi Emirate

August 2013

Date of Release: October 2013

Introduction

This report presents statistics on the value of non-oil merchandise trade which entered or exited the territory of the Emirate of Abu Dhabi through the ports of Abu Dhabi (comprising air, sea and road ports) in August 2013. It should be noted that foreign trade data presented in this report do not cover non-oil exports and imports through ports of the other Emirates in the UAE.

The data have been sourced from the Abu Dhabi Department of Finance – Customs Administration, and the scope of the statistics therefore is restricted to the trade flows recorded at ports under the jurisdiction of the Customs Administration. The report highlights the relative importance of each individual component of imports, non-oil exports and re-exports.

The data are presented according to the Standard International Trade Classification (SITC), Revision 4, the Broad Economic Categories (BEC), and by country. In addition, a monthly time series of historical data for total imports, non-oil exports and re-exports is presented.

The Explanatory Notes section at the end of this report defines the key terms and technical concepts used in the compilation of non-oil merchandise trade statistics.

Readers are encouraged to refer to that section while reading the statistics and information outlined in the report.

Key Points

Monthly non-oil merchandise trade, August 2013

The total value of non-oil merchandise trade in August 2013 was AED 9,825 million, with imports of AED 7,135 million (72.6% of total), non-oil exports of AED 1,461 million (14.9% of total) and re-exports at AED 1,229 million (12.5% of total).

The August 2013 total decreased by AED 247 million (-2.5%) compared with July 2013, with imports decreasing by AED 269 million (-3.6%) and re-exports by AED 196 million (-13.8%), while the value of non-oil exports increased by AED 219 million (17.6%) over the same period.

A year on year comparison (August 2012 to August 2013) shows a decrease of AED 1,390 million (-12.4%) in total trade, with imports decreasing by AED 1,891 million (-21.0%), while the value of non-oil exports increased by AED 354 million (32.0%) and re-exports by AED 147 million (13.6%) over the period.

The data for 2013 are preliminary data, and may be revised

Non-oil merchandise trade from July 2013 to August 2013

An analysis of non-oil merchandise trade data by Standard International Trade Classification (SITC), shown in the attached Statistical Table 1 for July 2013 to August 2013, reveals the following:

- The value of total imports decreased by 3.6%, with decreases of AED 80 million (-13.6%) in “Crude materials, inedible, except fuels” and AED 68 million (-3.8%) in “Manufactured goods classified chiefly by material”
- The value of non-oil exports increased by 17.6%, with increases of AED 278 million (60.1%) “Chemicals and related products” and AED 77 million (279.8%) in “Machinery and transport equipment” being partially offset by a decrease of AED 100 million (-15.1%) in “Manufactured goods classified chiefly by material”.
- The value of re-exports decreased by 13.8%, with a decrease of AED 155 million (-15.4%) in “Machinery and transport equipment” and AED 42 million (-15.6%) in “Miscellaneous manufactured items”.

Non-oil merchandise trade from August 2012 to August 2013

An analysis of the SITC data from August 2012 to August 2013 highlights that during the period:

- The value of imports decreased by 21.0%, with decreases of AED 1,405 million (-30.8%) in “Machinery and transport equipment” and AED 418 million (-19.8%) in “Manufactured goods classified chiefly by material”.
- The value of non-oil exports increased by 32.0%, with increases of AED 158 million (27.2%) in “Chemicals and related products”, AED 133 million (31.1%) in “Manufactured goods classified chiefly by material” and AED 65 million (166.4%) in “Machinery and transport equipment”.
- The value of re-exports increased by 13.6%, with increases of AED 133 million (18.5%) in “Machinery and transport equipment” and AED 25 million (12.6%) in “Miscellaneous manufactured items”.

Non-oil merchandise trade by country, August 2013

An analysis of non-oil merchandise trade data by the top 5 countries for August 2013, shown in Statistical Table 3, reveals the following:

- The three main countries of origin for imports were Saudi Arabia (AED 870 million), United States of America (AED 854 million) and Japan (AED 629 million). These three countries represented 33.0% of total imports.
- For non-oil exports, the top three countries of destination were Saudi Arabia (AED 459 million), China (AED 350 million) and Singapore (AED 120 million). These three countries represented 63.5% of total non-oil exports.
- The three main countries of destination for re-exports were Qatar (AED 269 million), Kingdom of Bahrain (AED 194 million) and Saudi Arabia (AED 191 million). These three countries represented 53.3% of total re-exports.

Monthly non-oil merchandise trade historical series, January 2011 to August 2013

Figure 1 shows the monthly historical series for imports, non-oil exports and re-exports from January 2011 to August 2013. The detailed data is shown in the attached Statistical Table 4.

The largest imports total was recorded in October 2011 (AED 12,775 million), the largest non-oil exports (AED 3,109 million) was recorded in April 2011 and the largest value of re-exports was recorded in March 2013 (AED 1,592 million).

Explanatory Notes

Glossary

This report contains certain terms specific to merchandise trade and necessary when analyzing the trade statistics of Abu Dhabi Emirate. They include the following terms:

Merchandise Trade

Merchandise Trade statistics record goods which add to or subtract from the stock of material resources of Abu Dhabi by entering or leaving its territory. Throughout this report, the term merchandise trade statistics refers to trade which moves through the ports of Abu Dhabi only, and do not capture inter-emirate trade activity.

Imports

Imports are goods that enter Abu Dhabi's customs and economic district from various parts of the world, excluding other emirates in the United Arab Emirates, and receive customs clearance. Goods are considered imports regardless of whether they enter the Emirate directly or are retrieved from customs warehouses, temporary entry areas or free zones inside the country. These goods receive customs clearance in order to become part of Abu Dhabi's merchandise balance.

Re-exports

Re-exports represent goods that are imported from abroad, enter Abu Dhabi's customs and economic district and become part of the Emirate's merchandise balance. These goods are then re-exported as they are, without any modification, outside the country.

Non-oil Exports

Non-oil exports include goods that are entirely produced locally or in whose production process local resources are used. Non-oil exports through the ports of Abu Dhabi may include goods that were produced in other Emirates in the United Arab Emirates. Oil is excluded from these goods. These goods leave Abu Dhabi's customs and economic district to the outside world, reducing the Emirate's non-oil merchandise trade deficit.

Classifications

The non-oil merchandise trade statistics are presented in accordance with the two main internationally recommended output classifications: Standard International Trade Classification, Revision 4 (SITC) and Broad Economic Categories (BEC).

- SITC groups goods according to their level of manufacturing or processing
- BEC groups goods according to their main end use, namely capital, intermediate consumption and consumption goods

If users require statistics by the Harmonized Commodity Description and Coding System (HS), these are available from SCAD on request. The HS is primarily an input classification, and is the basis on which goods are recorded with Customs by traders.

Data source

Data are obtained from Department of Finance – Customs Administration. The data are processed and passed to Statistic Centre – Abu Dhabi for further editing, compilation and reclassified according to statistical classifications for foreign trade.

Valuation

In line with the World Trade Organization (WTO) agreement on valuation:

- Exports (including re-exports) are valued free on board (fob), which represents the value at the export border, and includes inland freight costs and packaging
- Imports are valued on the cost insurance and freight (cif) basis, which represents the value at the import border, and includes the additional cost of freight and insurance in transporting the goods internationally

Notes on Tables

Changes (levels and %) in all tables are based on unrounded numbers.

Relative importance is calculated as the ratio between the value of the sub-group and the total value for all groups, expressed as a percentage.

Totals in some tables may not add up due to rounding.

The data for 2013 are preliminary, and may be revised.
